DISC MOWERS

REQUIRES LESS HORSEPOWER TO OPERATE • PRODUCES LESS HEAT

Ranch Rite® disc mowers are more reliable, allowing you to spend more time cutting hay and less time fixing implements. The mower connects to the tractor with a 3 point hitch, or cat 2 connection. The mower comes with Kevlar reinforced drive belts. Ranch Rite® mowers can be controlled using the tractor's hydraulic system to make it easy to match the pitch of the field you are working in. Tractor should weight about 4,500 lbs. All Ranch Rite® disc mowers come with OmniGear® and RPM Transmission® kits.

MODEL	DMV-40-6	CUTTER HEADS	6	CUTTER WIDTH	7FT, 8IN

DRUM MOWERS

QUICK CHANGE BLADES

This mower cuts with two large drums, because of this, you don't need a giant, heavy implement hanging off the side of your tractor to get your fields cut. The drums rotate in reverse from one another, leaving behind a perfect windrow. All Ranch Rite® drum mowers come with OmniGear® and RPM transmission® kits.

HAY TEDDERS

6 ARMS PER ROTOR WITH 2 TINES PER ARM • OMNIGEAR GEARBOXES • 1 YEAR WARRANTY

Ranch Rite® Hay Tedders are perfect for a farmer looking to produce their own feed, or a land-owner looking to make some hay. Our tedders will help decrease your drying times on medium sized fields, allowing you to bale faster. The Ranch Rite® Hay Tedder does not rake the hay into a windrow, it fluffs the hay, decreasing dry time and increasing yield. All Ranch Rite® Hay Tedders come with OmniGear® and RPM Transmission® kits.

HAY RAKES

10 FOOT WORKING WIDTH • RAKE OR DRY YOUR HAY FASTER

Ranch Rite® Hay Rakes are perfect for a farmer looking to produce their own feed, or a land-owner looking to make some hay. They will help decrease your drying times on small to medium sized fields, and allow you to create or turn your windrow. While they can be difficult to use on corners, the single-sided rake has proven itself a cost-effective tool for years. All Ranch Rite® Hay Rakes come with OmniGear® and RPM Transmission® kits.
